a overdispersion
overdispersion $\log_{10}\varphi$
nanos3
krt4
gsc
chd
ta
sox3
actb1
eef1a1l1
mean UMIs per cell (m)
weak, FDR 50% (421)
moderate, FDR 10% (271)
strong, FDR 1% (157)
typical, extrapolated
typical (fitted trend)
bin medians
weak cutoff
moderate cutoff
strong cutoff
b zeros: heterogeneous
fraction of zeros − expected (NB with typical φ)
mean UMIs per cell (m)
heterogeneous (weak) (421)
NB, typical φ
Poisson
c zeros: HVGs only
mean UMIs per cell (m)
HVGs, not heterogeneous (1,661)
NB, typical φ
Poisson
