secondary proxies vs replicated programs (50% epiboly)
cell text: ▲/▼ replicated call, c = not separable from program genes, n libraries significant +/−
ID1 GO: positive regulation of apoptotic proce
ID2 presumptive shield | GO: regionalization
ID3 presumptive endoderm | GO: gastrulation
ID4 epithelium | GO: intermediate filament-bas
ID5 reproductive system | GO: gamete generatio
ID6 neural plate | GO: negative regulation of
ID7 presumptive mesoderm | GO: pattern specifi
ID8 GO: nucleosome organization
ID9 GO: chromosome condensation
