(a) heterogeneous genes per library
population
random cells (same library, same number)
(b) per program
neural crest
endoderm
mesoderm
presomitic mesoderm
blastomere
forebrain eye
non neural ectoderm
hindbrain
margin
placodes
midbrain hindbrain boundary
lateral plate
tailbud
population / random (clipped at 2)
(c) ubiquitous genes
apoc1
apoeb
histh1l
ved
zgc:110425
irx7
cdx4
fosab
msgn1
marcksl1b
share of library populations
in a curated program
in none
